Product Description

Sno-Way 29R Series 2 Truck Snow Plow

The 29R Series 2 snowplow is 8'10" wide and 29 inches tall plow and moves more snow than any plow in this class.

The "R" in the model identifier refers to the Revolution series of plows. These plows are designed with patented hydraulic end wings that can be controlled together or independently to move the snow where you want it at any time. Each wing can be moved from a straight out position into a 90 degree orientation to the main blade - effectively creating a box plow. This patented dual-wing plow design provides you the ability to move up to 4.8 cubic yards of snow which is double the closest competitor's V plow or expandable plow!

Engage the Patented Down Pressure® Hydraulics System that increases snow moving capacity another 30% and you have the ultimate snow clearing machine.

Common Truck Applications: 3/4 Ton: F-250, Ram 2500, 2500 Sierra, 2500 Silverado 1 Ton: F-350, Ram 3500, 3500 Sierra, 3500 Silverado

Features:

- LED Thermosensitive heated Lights
