Product Description

Sno-Way 26R Series 2 Truck Snow Plow

The 26R Series 2 Snow Plow is a revolutionary plow for ½ ton trucks providing more snow moving capability and flexibility than any other plow in the industry.

The “R” in the model identifier refers to the Revolution series of plows including the 26R, 29R and Revolution HD models. These plows are designed with patented hydraulic end wings that can be controlled together or independently to move the snow where you want it at any time. Each wing can be moved from a straight out position into a 90 degree orientation to the main blade – effectively creating a box plow. This patented dual-hinge plow design provides you the ability to move up to 3.6 cubic yards of snow which is double the closest competitor’s V plow or expandable plow!

Engage the Patented Down-Pressure® Hydraulics System that increases snow moving capacity another 30% and you have the ultimate snow clearing machine.

Common Truck Applications: 1/2 Ton: 1500 Avalanche, F-150, Ram 1500, 1500 Sierra, 1500 Silverado, 1500 Suburban, 1500 Yukon, Toyota Tundra

Features:

- LED Thermosensitive heated Lights
 - Pro Control 2 Plus (controls plow & lights)
 - Upgraded Hydraulics Package
 - Outboard Mount Stand
 - Complete Fleet 2-Plug Connection System
 - ESS™ — Energy Smart System
-
