Product Description

Sno-Way Flared 29VHD Series 2 Truck Snow Plow

Double acting wing cylinders are specifically designed to provide maximum force in the forward or back hydraulic position. These optimized cylinders keep the plow wings from being forced open in heavy snow and allow for superior vee-plow back dragging in tight quarters.

With the Down Pressure® Hydraulic System as standard equipment, this plow will clean better and cut 30% of your plowing time. The Down Pressure Hydraulics add over 250 pounds of down force on the cutting edge which is a first in the industry and scrapes clean forward and maximizes back dragging.

Sno-Way 29VHD V-Plow handles obstructions with ease utilizing a patented Shock Killer™ Trip Return System which reduces blade return shock to the truck and the driver.

Sno-Way pays attention to even the smallest details to be sure operators can maximize performance and efficiency. The tube steel tab-slot and lock construction ensures component fit and proper welding while the pre-drilled top rail allows the contractor to easily add the E-Z Fit Deflector in a few minutes.

Common Truck Applications: 3/4 Ton: F-250, Ram 2500, 2500 Sierra, 2500 Silverado 1 Ton: F-350, Ram 3500, 3500 Sierra, 3500 Silverado Class 4: F-450, Ram 4500, 4500 Sierra, 4500 Silverado Class 5: F-550, Ram 5500

Features:

- LED Thermosensitive Heated Lights
 - Wired Pro Control 2 Plus ONLY (controls plow & lights)
 - Upgraded Hydraulics Package
 - Outboard Mount Stand
 - Complete Fleet 2-Plug Connection System
 - ESS™ — Energy Smart System
-
