Product Description

Sno-Way Flared 22V Series 2 Truck Snow Plow

Flared Wing V Plow for Downsized Truck

The Flared Wing 22V Series 2 V-Plow is built for downsized trucks such as the Chevy Colorado, Ford Ranger, Ford Bronco, Jeep Wrangler to name a few. This is a Light-Commercial plow designed for use by contractors, facility managers, municipalities and universities or school districts. Great applications include driveways, sidewalks, and tight spaces.

The Flared Wing design showcases a 22-inch center and a 27-inch outer height for greater snow-casting. Standard structural features include a direct linkage system delivering hydraulic-controlled lift and lower functionality, reactive Down-Pressure system providing over 250 lbs. of down force for a cleaner scrape, single jack stand for easy on/off with the Drive-In Mount and a Trip Edge blade design to dampen shock forces going into the frame of the truck.

The ESS Smart Sight™ system is the standard wiring/lighting platform that provides efficient power and bright lights along with the ability to add optional lighting including the Smart Flash Kit™. The ESS system allows a user with many vehicles to easily move this plow from truck to truck.

The Flared Wing 22V Series 2 Vee Plow weighs just 380 pounds so it allows any person with a downsized truck to put those trucks back to work.

Features:

- LED Thermosensitive Heated Lights
 - Pro Control 2 Plus (controls plow & lights)
 - Upgraded Hydraulics Package
 - Complete Fleet 2-Plug Connection System
 - ESS™ — Energy Smart System
-
