Product Description

Sno-Way 22 DriveWay Series 2 Truck Snow Plow

Fully Hydraulic DriveWay Plow

Two blade sizes – 6'-8" and 7'-6" – each 22" high, help you meet your driveway plowing head-on. High-strength steel FlexForce™ frame construction, direct linkage lifting system and an ultra-responsive hydraulic package are all combined in a small performance package in the 22 Series.

Sno-Way designed the 22 DriveWay Series 2 Snow Plow specifically for trucks and SUV's smaller than ½ ton trucks. Producing a durable, fully functional plow for smaller trucks is a specialty of Sno-Way. In 1978, Sno-Way built the first plow to fit a Subaru Brat and has been the only plow company to dominate this sector of the market since.

Engineers have perfected the appropriate use of various types of high strength steels in the right combination of components to keep strength up and weight down. The 22 series plow blade can be seen from a distance as it is a steel frame with polycarbonate blade face. The original intent of this design was as a see-through and impenetrable surface but today it is used to keep weight down and structural integrity high.

The Sno-Way hydraulic system is specifically engineered for the 22 DriveWay Series 2 Plow to allow for fast action and durable hydraulic performance. Custom designed cylinders, fittings, hoses and internal components are married with the optimal geometry design to create the ultimate small plow system.

Features:

- LED Thermosensitive Heated Lights
 - Pro Control 2 Plus (controls plow & lights)
 - Upgraded Hydraulics Package
 - Complete Fleet 2-Plug Connection System
 - ESS™ — Energy Smart System
-
